

AVTAR FASTENERS PVT. LTD

AN ISO 9001-2015 COMPANY

Your one stop shop for Cold Forged, Machined and finished components and all type of high tensile and special Fasteners

AN INSIGHT

- As enshrined in our brand, our 'AVTAR' has taken shape to fasten together all that is entrusted to us, in the most precise manner. Our work and craft involve mechanically binding two or more objects, be it through standard or non-standard screws, nails, bolts, nuts, washers, rivets and special components in ferrous and non-ferrous or stainless steel.
- We make the components by cold-forging, as per the high-volume requirements of our clients, with high benchmarks in quality and delivery. Our core team has a wide spectrum of expertise, across category and industry. The specialisation we have is in the automotive category however, we would be keen and inspired to tailor-make for any other categories that our potential clients may need.
- AVTAR FASTENERS PVT LTD., is an ISO 9001-2015 certified organization, located in the heart of Chennai City, Tamil Nadu. We are well equipped to deliver high quantum and multifaceted, forged, machined components and fastener requirements, defined by quality and assured customer satisfaction.
- The team at AVTAR is vested with deep knowledge of the domain, with one of our founding members having spent his career, creating products and customer experiences that are remarkable and trustworthy and his credentials speak volumes of the finesse and impeccable service standards he delivered and which are now inculcated, in this enterprise.
- Going forward with our experience, we are focused towards bringing a fresh perspective to trade, devoting ample time to developments, uncompromising quality standards with a mindset to build long term business relationships firmly entrenching our hold on the path to sustain excellence in the years to come.
- Creation of new concepts, ambitious expansion tempered by a desire to consolidate strengths, an amalgamation of versatilities, skills and technologies provide the backbone to our operations.

OPERATIONS ...

- Keeping abreast with modernisation is the need of the hour and it is our keen eye for details which sets us apart from the others.
- Our offices and factories are computerized and equipped with the very latest in modern means of communication to ensure regular networking with the manufacturing as well as marketing aspect.
- Effective communication, follow ups, personal securitization, checking, ensuring correct labeling/tagging is done, correct vendor codes, cover notes – each of our team members play a pivotal role in our company ethos.
- Our transportation department is well versed with all government policies, freight forwarding across the country from various points.

QUALITY CONTROL ...

- All our Products conform to the highest international standards – we have comprehensive quality checks and stringent quality control tests are conducted at every stage throughout the manufacturing process which helps us maintain the high quality standard we have set ourselves.
- With the ISO 9001-2015 certification, we ensure a complete adherence to set standards right from recording of an enquiry, to quotation being sent, to orders being registered, to the process of manufacturing with thorough quality checks, to certification, to packing and supply. We have a complete exhaustive system in place following of which is a standard norm non-deviable.
- We are in the process of getting IATF16949:2016 Quality Certificate

BEEN THERE , DONE THAT ... NOW WHAT ?

- We actively seek new clients and innovative partners who share our visions and ideals.
- We accept the challenges the future may have to offer and constantly look to strengthen and augment our services to fulfill our clients needs.
- Its not about the competition and what they can offer; performance matters; making the right product, in the right quality, within the right timeframe , in the right price , using the right raw materials and conducting and going about our business in the right manner is what we are all about.
- Our commitment to our business is our forte and consistency has been a calling card for our company which is why our products find buyers in leading OEM's, importers, business houses and high profile companies, measuring up to our own benchmarks of high standards, we constantly pace ourselves !

BEYOND OUR BOUNDARIES ...

- We at Avtar strongly believe in keeping up with the times and we have actively travelled to various industrial fairs and exhibitions to keep abreast with new ideas, ideologies, technology as well as absorb the various introductions and usage of parts and products. Such exposure bears a very strong impact on business plans and growth and we implement new concepts to our already existing varied repertoire.
- This also leads to the creation of an altogether different line of business and service, that of exporting our products and parts across the world.

CLIENTS

MANUFACTURING MACHINERY

PRODUCT RANGE:

- Cold Forged and machined Components, Standard Fasteners, Special Fasteners, High Tensile Fasteners, Automotive Parts.
- Size: Diameter 4mm to Diameter 100 mm and upto 500 mm Length.
- Machinery List:
- Cold Forging Header:
 - Dia 1/2" x 300 mm Length : I No
 - Dia 3/4" x 320 mm Length : I No
 - Dia 1" x 300 mm Length : I No

MANUFACTURING MACHINERY

Trimming Machines	:	3 Nos
Rolling Machines	:	3 Nos
Vertical Press: 200 Tones	:	2 Nos
Vertical Press: 300 Tones	:	2 Nos
Vertical Press: 500 Tones	:	1 No
Vertical Press: 700 Tones	:	1 No

■ Machining Shop:

Traub Machines	:	7 Nos
CNC Lathes	:	6 Nos
VMC Milling	:	2 Nos
Cutting Machines	:	2 Nos

And all Tool Room Machines for Tooling's.

INSPECTION INSTRUMENTS: Full fledged Quality Control Room with all modern instruments, Hardness Tester and Profile Projector.

FORGING SHOP

EQUIPMENT

Used in cold forming is a vertical press Manual fed. Range 40Ton to 600 Ton with stroke from 25mm to 600mm
